Title: NESHAP for Integrated Iron and Steel Manufacturing (Renewal)

ICR Numbers: EPA ICR Number 2003.05, OMB Control Number 2060-0517.

ICR Status: This ICR is schedule to expire on August 31, 2012. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The NESHAP for Integrated Iron and Steel Manufacturing are subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 63, subpart FFFFF.

Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 419 hours per response. “Burden” means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose and provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operators of integrated iron and steel manufacturing facilities

Estimated Number of Respondents: 18

Frequency of Response: Initially, occasionally, and semiannually

Estimated Total Annual Hour Burden: 18,421

Estimated Total Annual Cost: \$1,832,122, which includes \$1,765,120 in labor costs, no capital/startup costs, and \$67,002 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations: 1) the regulations have not changed over the past three years and are not anticipated to change over the next three years; and 2) the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden. However, there is an increase in the total labor and Agency costs as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in cost estimates reflects updated labor rates available from the Bureau of Labor Statistics.
